Land and society in Golden Age Castile 1984

Land and Society in Golden Age Castile- David Erland Vassberg 1984

Rapport du principal à l’honorable Surintendant de l'instruction publique 1881

Spanish Society, 1400-1600- Teofilo F Ruiz 2014-09-11 Spanish Society depicts a complex and fascinating country in transition from the late Middle Ages to modernity. It describes every part of society from the gluttonous nobility to their starving peasants. Through anecdotes, a lively style and portraits of figures such as St Teresa of Avila and Torquemada, the book reflects the character and humour with which the common Spaniard endured an often-wretched lot. Beginning with a description of the geography, political life, and culture of Spain from 1400 to 1600, the unfolding narrative charts the country’s shifts from one age to the next. It unveils patterns of everyday life from the court to the brothel, from the ‘haves’ of the aristocracy and clergy to the ‘have nots’ of the peasantry and the urban poor. Historical records illuminate details of Spanish society such as the transition from medieval festivities to the highly-scripted spectacles of the early modern period, the reasons for violence and popular resistance and the patterns of daily living: eating, dressing, religious beliefs and concepts of honour and sexuality. This compelling account includes historical examples and literary extracts, which allow the reader direct access to the period. From the street theatre of village carnivals to the oppressive Spanish Inquisition, it gives an abiding sense of Spain in the making and renders vivid the colours of a passionate history.

**State and Society in the Early Middle Ages** - Matthew Innes 2000-04-24 This book, first published in 2000, is a pioneering study of politics and society in the early Middle Ages. Whereas it is widely believed that the source materials for early medieval Europe are too sparse to allow sustained study of the workings of social and political relationships on the ground, this book focuses on a uniquely well-documented area to investigate the basis of power. Topics covered include the foundation of monasteries, their relationship with the laity, and their role as social centres; the significance of urbanism; the development of property rights and the organization of states; community, kinship and lordship; justice and dispute settlement; the uses of the written word; violence and the feud; and the development of political structures from the Roman empire to the high Middle Ages.

**With Golden Visions Bright Before Them** - Will Bagley 2012-10-01 During the mid-nineteenth century, a quarter of a million travelers—men, women, and children—followed the "road across the plains" to gold rush California. This magnificent chronicle—the second installment of Will Bagley’s sweeping Overland West series—captures the danger, excitement, and heartbreak of America’s first great rush for riches and its enduring consequences. With narrative scope and detail unmatched by earlier histories, With Golden Visions Bright Before Them retells this classic American saga through the voices of the people whose eyewitness testimonies vividly evoke the most dramatic era of westward migration. Traditional histories of the overland roads paint the gold rush migration as a heroic epic of progress that opened new lands and a continental treasure house for the advancement of civilization. Yet, according to Bagley, the transformation of the American West during this period is more complex and contentious than legend pretends. The gold rush epoch witnessed untold suffering and sacrifice, and the trails and their trails were enough to make many people turn back. For America’s Native peoples, the effect of the massive migration was no less than ruinous. The impact that tens of thousands of intruders had on Native peoples and their homelands is at the center of this story, not on its margins. Beautifully written and richly illustrated with photographs and maps, With Golden Visions Bright Before Them continues the saga that began with Bagley’s highly acclaimed, award-winning So Rugged and Mountainous: Blazing the Trails to Oregon and California, 1812-1848, hailed by critics as a classic of western history.

**The Golden Rhinoceros** - François-Xavier Fauvelle 2018-12-04 A leading historian reconstructs the forgotten history of medieval Africa From the birth of Islam in the seventh century to the voyages of European exploration in the fifteenth, Africa was at the center of a vibrant exchange of goods and ideas. It was an African golden age in which places like Ghana, Nubia, and Zimbabwe became the crossroads of civilizations, and where African royals, thinkers, and artists played celebrated roles in the globalized world of the Middle Ages. The Golden Rhinoceros brings this unsung era marvelously to life, taking readers from the Sahara and the Nile River Valley to the Ethiopian highlands and southern Africa. Drawing on fragmented written sources as well as his many years of experience as an archaeologist, François-Xavier Fauvelle painstakingly reconstructs an African past that is too often denied its place in history—but no longer. He looks at ruined cities found in the mangrove, exquisite pieces of art, rare artifacts like the golden rhinoceros of Mapungubwe, ancient maps, and accounts left by geographers and travelers—remarkable discoveries that shed critical light on political and architectural achievements, trade, religious beliefs, diplomatic episodes, and individual lives. A book that finally recognizes Africa’s important role in the Middle Ages, The Golden Rhinoceros also provides a window into the historian’s craft. Fauvelle carefully pieces together the written and archaeological evidence to tell an unforgettable story that is at once sensitive to Africa’s rich social diversity and alert to the trajectories that connected Africa with the wider Muslim and Christian worlds.

**The Snake with Golden Braids** - Stephen G. Bunker 2006 The Snake With Golden Braids seeks to understand how local inhabitants of the extraordinarily rugged Andean topography of Huanoque, Peru came to understand their landscape and then build and maintain a system of irrigation ditches across it. The Huanoqueteños' original solution, a conceptually and architecturally complex irrigation system, was abandoned after the Spanish conquest of Peru, and replaced by a simpler, yet still complex, system, which is still in place today. Stephen G. Bunker combines a history of these systems with a rethinking of the local myths, legends, and environment to help make sense of the land and its uses. This book follows his intellectual and spiritual journey to learn not just about building and managing irrigation ditches, but about the very different ways of knowing the environment and the spirits of the earth that informed and empowered the original builders. Bunker's first-hand experience and research will prove an invaluable asset to sociologists, anthropologists, and environmentalists.
