For to Speke Frenche Trewely - Douglas A. Kibbee 1991-01-01
The first grammatical descriptions of the French language were produced in England, several centuries before the first grammar written in French (but also several centuries after the Norman Conquest). This book describes the status of French in England during the period from the marriage of Emma of Normandy to thelred (1004) to the fixing of a (relatively) standard pedagogical scheme for the teaching of French of English speakers (ca. 1600). During this period French passed from a native language to a second language, became the official language of the legal profession, and ultimately fell back to a position of social accomplishment. At the same time, different pedagogical and descriptive traditions developed to meet these various needs. Here Kibbee traces the interaction of cultural, intellectual, social and technological history with the elaboration of a grammatical tradition. The book includes a bibliography and indexes of names, titles and subjects.
The Familiar Enemy - Ardis Butterfield
2009-12-10 The Familiar Enemy re-examines the linguistic, literary, and cultural identities of England and France within the context of the Hundred Years War. It reassesses the concept of 'nation' in this period through a wide-ranging discussion of writing produced in war, truce, or exile from the thirteenth to the fifteenth century, concluding with reflections on the retrospective views of this conflict created by the trials of Jeanne d'Arc and by Shakespeare's Henry V. Ardis Butterfield considers authors writing in French, 'Anglo-Norman', English, and the comic tradition of Anglo-French 'jargon', including Machaut, Deschamps, Froissart, Chaucer, Gower, Charles d'Orléans, as well as many lesser-known or anonymous works. Traditionally Chaucer has been seen as a quintessentially English author. This book argues that he needs to be resituated within the deeply francophone context, not only of England but the wider multilingual cultural geography of medieval Europe.

First systematic study of the teaching aid which constituted the set-texts of Latin instruction in 13c England.

Law, Language and Change - Caroline Laske

Inevitably, during the course of publication the Dictionary changed, but in the case of AND1 the modification towards the middle of the alphabet was radical, with the inclusion of material drawn from Elsie Shanks's very substantial Dictionary of Law French, and the fichier assembled by J. P. Collas. Taken together, these two sources, which extensively explored the non-literary register of administrative and legal Anglo-Norman, dramatically changed the range and scale of AND1, so that the second half of the first edition is strikingly different from the first. In the late 1980s, the decision was taken to revise the entire dictionary for what, in the event, is proving to be a massively altered second edition. Not only is the Shanks and Collas material now being incorporated into earlier letters; the new dictionary (AND2) also draws on substantial quantities of hitherto unpublished documents which have appeared since the early 1970s. Lexical coverage has been enormously expanded in the fields of administration, law, science, botany, and medicine. The revised edition draws extensively on concordanced and digitized texts,
and it offers a well-developed coverage of locutions. It features, too, a substantially revised layout. The articles are broken down and made much more usable by including a summary of the main senses at the head of each article, numbered in a way that takes a reader directly to the relevant portion of the entry body. As well as speeding up the location of a particular sense, this layout offers a clear overview of the principal semantic pattern of a particular word.

**La poésie palinodique à Rouen (1486-1550)** - Denis Hûe 2002

A Rouen, de 1486 à la Révolution française, s'est tenu régulièrement un concours de poésie à la louange de l'Immaculée Conception de Marie. Ce qui aurait pu n'être qu'une festivité provinciale prend, au début du XVIe siècle, une ampleur et une dimension telle que les meilleurs poètes du temps, les Marot, les Parmentier, Guillaume Cretin et André de La Vigne y participent. Plus d'un millier de textes, des centaines de poètes sont ici redécouverts et remis en situation. Cette étude fait apparaître les éléments théologiques, sociologiques et historiques d'une telle production, et met en lumière les raisons de son succès : une dévotion mariale comprise comme une exaltation de la création, et une poésie qui met en avant l'homme et ses activités. Dans cet inventaire heureux d'un monde qui croit à son salut se dessinent quelques-uns des plus beaux, des plus généreux moments de l'humanisme naissant.

Grammaires du vulgaire-Christopher Lucken 2003 Ce numéro s'est donné comme objectifs de resituer la langue médiévale dans une évolution longue (du Moyen Age au XVe siècle) et de mettre en avant les relations qu'elle a entretenues avec les langues qui lui ont préexisté et avec lesquelles elle a coexisté (latin et allemand notamment). Il s'agit également d'apprécier l'enjeu qu'a pu représenter l'institution du français dans la formation des identités nationales. Cet ensemble tente donc d'examiner comment la langue française a fait l'histoire et l'histoire la langue française, soit encore comment le français s'est fait dans l'histoire.
