Gender. Religion and Education in a Chaotic World Zohab Grosz 2012-12-04 The immune changes that the world is undergoing in terms of globalization and migration of peoples have had a profound effect on cultures and identities. This question is whether this means in religious identities for women and men in different contexts, whether such shifts are seen as beneficial, negative or insufficient, or whether social change actually means new conservations or even fundamentalisms. Surrounding these questions is the role of education in any change or new contradiction. This unique book enhances an interdisciplinary discourse about the complex interactions between gender, religion and education in the contemporary world. Literature in the social sciences and humanities have expanded our understanding of women’s involvement in religious as part of a social movement, yet the empirical evidence is still understudied and often under theorized. How do people experience their religious identity in a new context or country is also a theme now needing more complex attention. Questions of the body, viability and injustice are receiving new treatment.

The Gender of Modernity

Gender, identity, and sexuality are receiving new treatments. This book fills these gaps. The book provides a strong comparative perspective, with 15 countries or contexts represented. The contest of education and learning covers schools, higher education, non-formal education, religious institutions, adult literacy, curriculum and textbooks. Overall, the book revisits a great complexity and often contradiction in modern negotiations of religion and secularity by girls and boys, men and women, and for a range of possibilities.

Gendering Musical Modernism

The book focuses primarily on American texts that reference and construct Marcel Duchamp as the originator of postmodern art. Amelia Jones contends that Duchamp, whose gift to postmodernism might best be viewed in terms of the potential of his readymades to destructure the contradictory notions of sexual difference and modernity.

Inherently patriarchal, or else assumed a simple opposition between men's and women's experiences of the modern world. Combining cultural history with cultural theory, and focusing on the fin de siecle, Felix Salpekar examines the gendered meanings of such notions as nostalgia, consumption, feminine writing, the popular sublime, evolution, revolution, and perversion. His approach is comparative and interdisciplinary, covering a wide variety of texts from the English, French, and German traditions: sociological theory, racial and national novels, decadent literature, political essays and speeches, neoclassical discourse, and sentimental popular fiction. Modernism, he takes us from Marcel Proust to Thomas Mann and Max Brod in Germany, and from Paul Eluard and Sacha Guitry in France to surrealism. As Felix Salpekar concludes, the problem of understanding the role of feminism in new social movements (race, gender, sexuality) is brought into being.

In her book Gender, Religion and Education in a Chaotic World Zohab Grosz 2012-12-04, she argues that understanding the complex interactions between gender, religion and education in the contemporary world is crucial. Literature in the social sciences and humanities have expanded our understanding of women’s involvement in religious and educational activities, yet the empirical evidence is still understudied and often under theorized. How do people experience their religious identity in a new context or country is also a theme now needing more complex attention. Questions of the body, viability and injustice are receiving new treatment.

Postmodern Fairy Tales

Cristina Bacchilega 2010-08-03 Postmodern Fairy Tales seeks to understand the fairy tale not as children's literature but within the broader context of folklore and literary studies. It focuses on the narrative strategies through which women are portrayed in four classic stories: "Snow White," "Little Red Riding Hood," "Beauty and the Beast," and "Bluebeard." Bacchilega traces the oral sources of each tale, offers a provocative interpretation of contemporary versions by Angela Carter, Robert Cooper, Donald Barthelme, Margaret Atwood, and Tanis Lee, and explores the ways in which the tales are transformed in film, music, and television.

The author claims that the fairy tale is a gendered genre and that it reflects and reinforces the gendered expectations of society. She argues that the fairy tale has been used to reinforce patriarchal values and to maintain the status quo, and that it has been used as a means of social control.

History and National Ideology in Greek Postmodernist Fiction

M. Nash 2012-11-14 Based on interviews with pregnant women, this book provides a multi-disciplinary empirical account of pregnant women's experiences of perinatal knowledge production. This book would undoubtedly be of considerable use to anyone seeking to understand and get to grips with feminist methodological issues. Feminism and Psychology Who would be a feminist now? Contemporary 'political realism' suggests that the essential of the battle have already been won, and that the current generation of women entering University is used to seeing feminism presented as 'fashion', 'extremes' and 'unproductive'. Considering such assumptions, this important new book asks for the value of empirical investigations of gendered life, and brings together the theoretical, political and practical aspects of feminist psychology. The book reaches to methodological issues and to methodological approaches to investigations about knowledge production - shows that feminist methodology has a distinctive place in social research - guides the reader through the terrain of feminist methodology and clarifies how feminists can claim knowledge of gendered social existence - connects abstract issues of theory with issues in fieldwork practice. This timely and accessible book will be an essential resource for students in women's studies, gender studies, sociology, cultural studies, social anthropology and feminist psychology.

Trifles-Susan Glaspell 1909-10-01 "Trifles" is a one-act play by Susan Glaspell, who is considered an important feminist writer of the early Twentieth Century. The play was first performed in 1916 by the Provincetown Players in Provincetown, Massachusetts. The playwright played the role of Mrs. Hale. Gendering Musical Modernism

Ellie M. Hisama 2006-11-02 This book explores the work of three significant American women composers of the twentieth century Ruth Crawford, Marian Bauer and Miriam Gideon. It offers information on both their lives and music and skillfully interweaves history and musical analysis in ways that both the specialist and the more general reader will find compelling. Ellie Hisama suggests that recognising the impact of a composer's identity on the music itself imparts valuable ways of hearing and understanding these works and looks important new ground towards constructing a feminist music theory.

Empowering Gender and Postmodernism

Beate Neumeier 2001 This volume assembles critical essays on, and excerpts from, works of contemporary women writers in Britain. It focuses on the fictional work of women writers whose interest in testing and transgressing textual boundaries is rooted in a specific awareness of gendered multicultural reality. Dancing Jewish—Rebecca Biss 2014 While Jews are commonly referred to as the “people of the book,” American Jewish chorographers have consistently turned to dance as a means to articulate personal and collective identities, in their works often drawing on choreography, advances in feminist theory, and on their own experiences as themselves, individuals, and, well. Dancing Jewish delineates this rich history, demonstrating that Jewish chorographers have not only been vital contributors to American modern and postmodern dance, but that they have also played a critical and acknowledged role in the history of dance in the United States. In this introductory essay, I examine the role dance has played in the struggle between Jewish identification and integration into American life, the book moves across disciplinary boundaries to show how cultural identity, ethnicity, nationhood, and gender are formed and performed through the body and its motions. A dancer and choreographer, as well as an historian, Rebecca Biss offers evocative analyses of dances while asserting the importance of embodied methodologies to academic research. Featuring over fifty images, a companion website, and work from 1930 to 2005 by a wide range of artists—including David Dorfman, Dan Froot, David Gordon, Hasboush, Margaret Jenkins, Pauline Koner, Dvora Lapson, Liz Lerman, Sophie Maslow, Anna Sokolow, and Benjamin Zemach—Dancing Jewish offers a fresh perspective on reinterpreting performance and establishes dance as a crucial site in which American Jews have grappled with cultural belonging, personal and collective histories, and the values that bind and pull them apart.

Contemporary Culture—Alan Nadel 1995 Alan Nadel provides a unique analysis of the rise of American postmodernism by viewing it as a breakaway in Cold War cultural narratives of containment. These narratives, which embodied an American postwar foreign policy charged with checking the spread of Communism, also operated, argued, within a wide spectrum of cultural life in the United States to contain atomic secrets, sexual license, gender roles, nuclear energy, and artistic expression. Because these narratives were deployed in films, books, and magazines at a time when American culture was for the first time able to dominate global entertainment and capitalize on global production, containment became one of the most widely disseminated and highly privileged narratives in contemporary culture. Examining such work of such postmodern theorists as Stuart Hall, Jean Baudrillard, and Robert Stam, Nadel advocates for a reorientation of cultural analysis that makes the postmodern narrative a crucial site of resistance within the historical and political frameworks of the United States.

Reworking Gender—Karen Ashcraft 2004 Reworking Gender: A Feminist Communicology of Organization examines the place of gender and feminist scholarship in contemporary organizational studies. Arguing for a critical perspective of gender, this book offers a comprehensive framework for interpreting performance and establishes dance as a crucial site in which American Jews have grappled with cultural belonging, personal and collective histories, and the values that bind and pull them apart.

Postmodern Moments in Economics—David P. Bizzarro 2014 The first book to document the rise of postmodern economic thought, Economic Velocity explores the struggle between economic velocity and the desire of the State to control the flow of money. Economic Velocity traces the breakdown of this discourse through containment such as the Big Bang and the Free Speech Movement at Berkeley, and ties its collapse to the onset of American postmodernism, typified by works such as Catch-22 and The Man Who Fell to Earth. Economic Velocity demonstrates that in our work of art, the idea of the state, the balance of economic velocity, and the desire for containment, and shows how a multifaceted national policy can become part of a nation’s cultural agenda and a source of meaning for its citizenry.

Gender and Groupwork—Marcia Cohen 2003-09-02 Thinking about gender can enrich the work of all group practitioners and can make a real difference in people’s lives. Based on a series of experiences in North America and the USA, Gender and Groupwork brings together the best of groupwork knowledge, skills and values in a true transatlantic partnership. The book summarises the history of gender-based groups for both women and men and outlines a wide range of exciting and challenging examples of groups in different contexts. Often moving, and always engaging, these accounts encompass groups for older women and women facing illness and dying, and groups for those who are caregivers and those who are being cared for. These groups provide for a deep understanding of domestic violence, where groups can often be the intervention of choice. Gender and Groupwork demonstrates that, despite the challenges of poststructuralism and postmodernism, the practice of groupwork is alive and well. It provides new ideas and new models to help move practice forward, making it a welcome addition to the groupwork literature.

Postmodern Turn—Steven Seidman 1994-11-25 This book collects the most important statements of the postmodern tradition, including the classics of essays of authors such as Lyotard, Haraway, Foucault, and Derrida.

Cynical Theories—Helen Pluckrose 2020-08-25 You heard that language is violence and that science is war? Have you read that certain people shouldn’t practice yoga or cook Chinese food? Or been told that being obese is healthy, that there is no such thing as biological sex, or that only white people can be racist? Are you troubled by the knowledge that you have been quickly deprived that objective knowledge and manipulated in ways that undermine your personal identity? Helen Pluckrose and James Lindsay document the evolution of the dogma behind these ideas, from its coarse origins in French postmodernism to its refinement within traditional academic fields. Today this dogma is recognizable as much by its effects, such as cancel culture and social-media deities, as by its tenets, which are all too often embraced as automatic in mainstream media. Knowledge is a social construct; science and reason are tools of oppression; all human interactions are sites of oppressive power play; and language is dangerous. As Pluckrose and Lindsay warn, the unchecked proliferation of these anti-Enlightenment beliefs present a threat not only to liberal democracy but also to modernity itself. While acknowledging the need to challenge the complacency of those who think a just society has been fully achieved, Pluckrose and Lindsay break down how these ideas, often-weave academic and popular literature, can be used to underpin the future.
